

GE  
Industrial Solutions

Leading the future  
of electrification.

imagination at work

Our comprehensive product and service solutions touch all parts of the electrical infrastructure across these segments:

### **Oil and Gas**

We offer efficient, reliable system design to reduce unplanned downtime, advanced technology for employee protection and dedicated, ongoing support.

### **Data Center**

GE solutions balance efficient power and reliability for today's data-driven, 24/7 world.

### **Marine**

We provide electrical distribution, asset availability and safety through high performing electrical solutions.

### **Industrial/Commercial**

Our safe, reliable and efficient electrical systems distribute power for buildings and factories worldwide.

### **Health Care**

Customers worldwide depend on GE to implement emergency critical power systems to safely and reliably energize their facilities 24/7.

### **Telecom**

Our solutions deliver precision power control, conversion and backup serving wireless and cable broadband service providers.

### **Mining**

With eight decades of experience developing, installing and maintaining systems, GE continues to deliver products that offer reliability, safety and performance excellence.

# GE's Industrial Solutions Business Units

 We're creating advanced global technologies that safely, reliably and efficiently distribute, protect and control electricity.

## Power Components

Innovative technologies for a safe and reliable electrical infrastructure, including:

- Air, Molded Case and Miniature Circuit Breakers
- General Purpose Controls
- Load Centers
- Dry Type Transformers
- Safety Switches and Disconnects

## Power Equipment

End-to-end electrical solutions to meet our customer's needs:

- Low-Voltage Equipment: Switchgear, Switchboards, Panelboards, Motor Control Centers and Enclosures
- Medium-Voltage Equipment: Switchgear, Motor Control Centers and Vacuum Circuit Breakers
- Power Delivery Equipment: Power Transformers, Cast Coil Transformers, Low- and Medium-Voltage Busway

## Critical Power

Broad portfolio of products and services to ensure reliable, efficient power:

- DC Power Systems: Large, Medium and Small Power Plants
- AC Power Systems: Uninterruptible Power Supplies (UPS), Automatic Transfer Switches (ATS), Parallel Switchgear, Surge Protection Devices
- Embedded Power: AC/DC Front Ends/Rectifiers and DC/DC Non-Isolated Point of Load and Isolated Bricks
- 24x7 Services for Mission-Critical Environments: Battery Maintenance, Facility Audit / Solution Frameworks, Retrofits, Tech Support and Training

## Industrial Services

Creating lifecycle opportunities with services:

- Power Delivery Services
- Parts Repair and Services
- Turnkey Project Management
- Consultation Services

# A global team working on what matters most to our customers

GE's Industrial Solutions engineers and employees around the world work to enable customers across various industries to overcome their electrical distribution and power challenges.
