This product has been certified by Baseefa, under certificate number Baseefa13ATEX0232X/5, dated on 2019-02-05.

Product Description:

The DB3BE G Sounder is rated up to 254V,15W and comprises a cylindrical body and two covers all moulded in Glass Reinforced Polyester. The front cover is an irregular shape which when fitted forms a chamber for the sound generating PCB's (with both AC & DC variants) and is permanently sealed/filled with a potting compound. In the front of this cover is a fine stainless steel mesh pressed metal wire element to facilitate sound transmission.

The circular rear cover closes an Ex e terminal enclosure and is secured by three M5 stainless steel screws. The screws may be profiled to be retained within the rear cover during assembly/dis-assembly. The Ex e chamber houses a certified terminal block of either 4, 6 or 8 (2x4) Ex e connection.

The base of this enclosure then forms the cover of the flameproof chamber and with integral cables passing through a potted bushing arrangement. The terminal enclosure is fixed with six M5x20mm long stainless steel socket head screws of grade A2-70 minimum.

The screws may be profiled to be retained within the rear cover during assembly/dis-assembly. The flameproof Chamber houses an assembly of a transformer and a control/terminal PCB.

Up to two M20 or M25 cable entries are provided in the side of the enclosure to accommodate suitably certified cable entry devices.
